

System Ecosystem & Architecture

A comprehensive guide to the professional ERP and CRM platform.

1. Production Workflow Lifecycle

The core of Jagdamba Profile ERP is a sophisticated 11-stage state machine that tracks every order from inception to final settlement.

Workflow Stage	Primary Actor
Order & Drawing Received	Office Administration
Nesting & Material Planning	Nesting Operator
Production / Laser Cutting	Production Team
Ready for Dispatch	Dispatch Manager
Payment & Settlement	Accounts Department

2. Technical Core: PDF Generation Engine

Located in `src/utils/pdfGenerator.ts`, this module uses `jsPDF` and `autoTable` to generate high-fidelity business documents.

- Vector-based Layouts: Pixel-perfect clarity at any zoom level.
- Auto-calculating Tables: Handles dynamic line items with automated totals.
- Multi-part Branding: Consistent header/footer injection.
- DOM Capture: Uses `html2canvas` for complex visual reports.
